1776 Token White Paper

The 1776 Cryptocurrency Token

The central banks are in the process of creating a world control system where every country in the world with a central bank will have its own master node blockchain containing tangible assets and commodities by which they will control humanity.

The 1776 Token has been designed utilizing a technology approach

to allow people who desire to live free - to live free

... from the coming world control system.

1776 is giving 100,000,000 FREE coins to 10,000,000 Freedom Lovers

Claim 10 Free 1776 on www.Freedom.social

Freedom.MARKET

is part of **Freedom.SOCIAL**
where you sell and buy things
worldwide with  Tokens

- ✓ LIST A PRODUCT OR SERVICE FOR SALE
- ✓ SEARCH PRODUCT AND SERVICES

Country

United States

1776 has its own Marketplace in www.FreedomMarket.social where goods and services can be purchased locally and worldwide

- www.FreedomMarket.social is similar to Craigslist
- Products and services to be listed free of charge
- Local Markets can be created and products and services purchased worldwide

Freedom.SOCIAL **FreedomTUBE**

Independent Media and End User Compensation

1. Independent media and all end users receive a Unique Link, example:
<https://freedom.social/clarkzkent-register> to refer family, friends to the Freedom platform and to claim 10 free 1776 Tokens
2. Independent media and all end users are paid in the 1776 Token to post, share, share in other social media, like, view and refer family and friends to the Freedom platform.
3. Independent media and all end users are paid 10% in US Dollars for end users who purchase the 1776 Token in US Dollars

Introduction

The 1776 Token has been designed utilizing a technological approach to allow people who desire to live free to make a decision to live free from the coming central banker world control system.

The BIS, IMF, and all central banks are moving quickly to implement centralized country specific blockchains and centralized country specific cryptocurrencies. National governments, and state and county governments and Fintech organizations are in the process of placing tangible assets and commodities on centralized blockchains utilizing *standardization* that will allow all transactions to be tracked, no matter the cryptocurrency utilized for a transaction. If blockchains utilize standardization for assets and commodities it will not matter if you utilize a cryptocurrency with anonymity because they control the asset or commodity and they will know your identity. The banks will be able to track all Bitcoin transactions and any cryptocurrency transaction where an asset or commodity where a financial transaction is made from a blockchain with standardization. This could lead to assets being centrally controlled leading to the potential for taxing, censorship, confiscation of the asset, or even control of you.

The 1776 Token has been designed to not be accessible by central bank blockchains nor mirrorable by standardization.

The 1776 Token and FreedomMarket will never participate in GLT Standardization and never participate in any potential cryptocurrency standardization which would allow centralized blockchains to mirror blockchains where transactions were created utilizing anonymous cryptocurrencies. The 1776 Token utilizes the following approaches and specifications to create the technology, as derived from the report: An Approach to FREEDOM BASED Blockchain and Cryptocurrency Technology:

Download report here: https://freedom.social/DigitalFreedom_v.05.pdf

The 1776 Token has been designed with the following technological approach:

- 1776 is a decentralized blockchain and cryptocurrency
- 1776 has Obfuscation for private transactions
- 1776 has its own blockchain
- 1776 is Proof of Stake (no mining)
- 1776 has its own Marketplace in www.FreedomMarket.social where goods and services can be purchased locally and worldwide
- 1776 and FreedomMarket do not participate in GLT Standardization
- www.FreedomMarket.social is similar to Craigslist
- Products and services to be listed free of charge
- Local Markets can be created and products and services purchased worldwide

The 1776 Token is a utility token and required system token to be utilized on www.FreedomMarket.social ("FreedomMarket") where products and services will be able to be purchased from participating businesses and individuals. The 1776 Token will be marketed and distributed and exposed to millions of people by independent media and truth seekers and activist platform at www.Freedom.social and www.FreedomTube.social

- A. 177,600,000 1776 Token will be initially minted
- B. The 1776 Token is a Proof of Stake cryptocurrency with additional coins generated per block, see the 1776 Token Specifications document for more information.
- C. The 1776 Token has Master Nodes, see the 1776 Token Specifications document for more information.
- D. 10% of 1776 Tokens, or 17,760,000 tokens were allotted to founders to develop the 1776 Token and develop the Freedom.social and FreedomTube platform. Leaving an available 159,840,000 tokens available.
- E. 1776 is giving away 10 free coins to 10,000,000 people, after achieved, this will provide the second largest blockchain in the world, only second to Bitcoin. When 1776 enters the exchanges, the plan is to have a minimum of one million wallets downloaded, thus establishing value.
- F. 159,840,000 minus 100,000,000 tokens given away leaves 59,840,000 available for the 1776 Token Pre-sale. If available tokens are not sold in the pre-sale, the remainder of 1776 Tokens will be sold on the cryptocurrency exchanges.

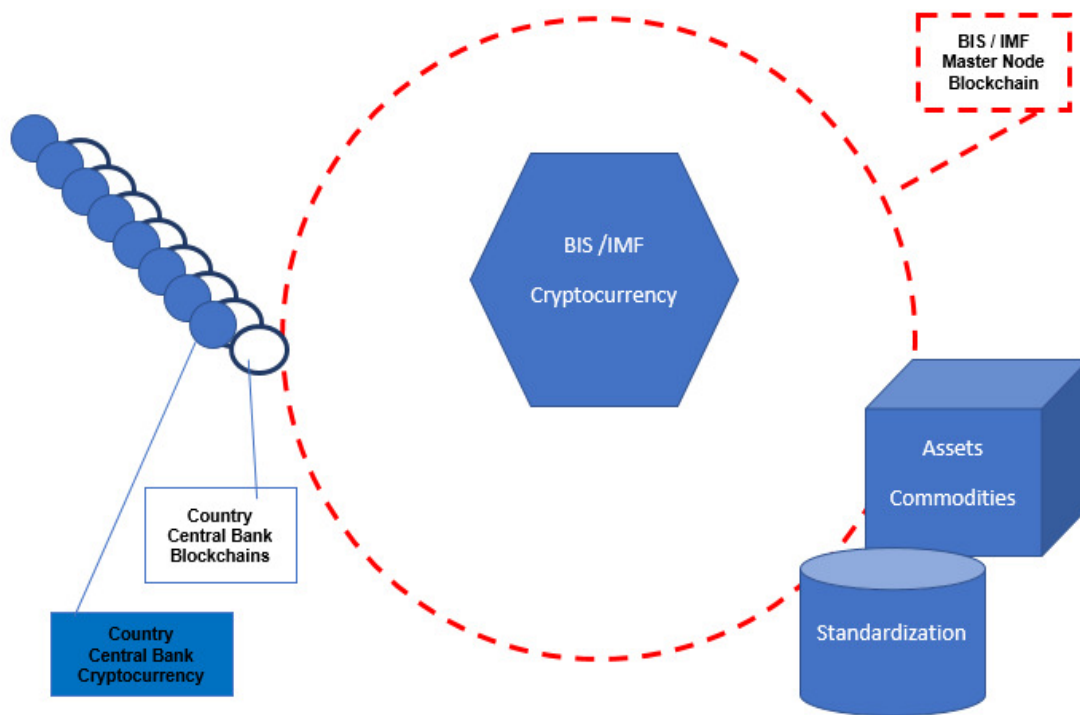

The 1776 Token Technological Approach

Freedom Currency Inc. conducted research on Central Bank Plans for DLT (digital ledger technology) and their plans for cryptocurrency. The 1776 Token is based on a technological approach to create freedom based blockchain and cryptocurrency technology to bypass and never participate in the coming central banker control system. The central banks are in the process of creating a world control system by which every country in the world with a central bank will have its own master node blockchain containing tangible assets and commodities by which they will control humanity.

The 1776 technological approach provides a technology strategy to build local, state, national and worldwide ecosystem based on free markets and free people utilizing technology to create local markets that are not accessible by Centralized Controlled Master Node Blockchains.

The 1776 Token utilizes the following approaches and specifications to create the technology, as derived from the report: An Approach to FREEDOM BASED Blockchain and Cryptocurrency Technology: Download report here: https://freedom.social/DigitalFreedom_v.05.pdf

Diagram of Central Banker Plans for DLT and Cryptocurrencies

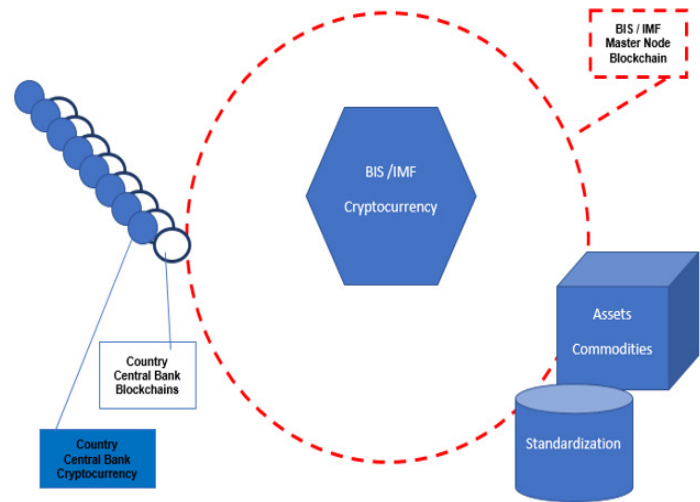

The 1776 Token

Blockchain and Cryptocurrency Technology

A technology strategy to build local, state, national and worldwide ecosystem based on free markets and free people utilizing technology to create local markets that are not accessible by Centralized Controlled Master Node Blockchains

The [report](#) provides factual proof that the Central Banks and all banks worldwide are at a frenzied pace to create Standardization standards for every tangible asset and every commodity on earth and list them on Distributed Ledger Technology (“DLT”) that are connected to cryptocurrencies that are controlled by Central Banks. The US government is asking the private sector to build the government DLT for them, [link](#). This document addresses financial and legal transactions and it not intended to detract from multi-media and educational content inserted into DLT / permanent blockchain and the many benefits of DLT in many market segments.

Standardization of tangible assets and commodities will allow any centralized master blockchain to map to and mirror any Standardized data fields. After all tangible assets or commodities have Standardization applied and placed on blockchains, **it does not matter what cryptocurrency you use to purchase a product or service, the transaction can be tracked.** If assets or commodities placed on “any” blockchain have Standardization, it will not matter if the cryptocurrency is anonymous, because any form of Standardization can be mapped to or mirrored. If the Federal Reserve, or IMF or BIS, and/or if local, county or state government in the future requires transactions to be conducted with a centralized cryptocurrency or a cryptocurrency token tied to the IMF eSDR cryptocurrency token, **they would have say in the transaction and could apply a tax or contingencies on a transaction.** This is “not” what Libertarians have in mind when setting free decentralized DLT and cryptocurrencies.

To date, several countries have announced new country specific blockchains and cryptocurrencies, including Japans J-coin: <http://www.businessinsider.com/japan-plans-new-digital-currency-j-coin-2017-9>, and Sweden <http://www.zerohedge.com/news/2017-09-25/cash-use-plumets-swedish-government-begins-testing-cryptocurrencies> as well as several other countries have announced plans for country specific blockchains and country specific cryptocurrencies. Most every country in the world that has a central bank has very large debt and very large budget deficits and have zero or negative interest rate policies, and are waging efforts to go cashless.

1776 Token Specifications v. 1.0

Coin Specifications	
Algorithm	Quark
Block Reward	Block 1 = 177600000 Blocks 2 thru 350 = 0
Block Time	120 seconds
Total Supply (from Proof of Work phase)	177600000
Port	1776
Minted Confirmations	50
Transactions Confirmations	6

The presale has been mined internally (blocks 1-10080) thereby creating the initial supply. This was done to ensure network integrity and to guarantee the stability of the network.

Proof of stake Master Nodes 60%	Proof of stake POS Minting 40%
Blocks 351- forever	10 SSS
Minimum Stake Coin Age	8 Hours

While the coin supply is infinite, a dynamic more adaptive economy is being developed to give supply and demand a synergistic relationship.

1776 Token Features

1776 has been designed utilizing a technological approach to allow people who desire to live free to live free, from the coming world control system. 1776 is based on cutting-edge cryptocurrency technology which many features are not available in most other cryptocurrencies. These features are services provided by a third party private network of semi centralized masternodes which provide crucial services such as:

The 1776 Token provides anonymized transactions using coin mixing technology, we call it *Obfuscation*.

Obfuscation - Obfuscation is mixing mechanism based on a decentralized approach facilitated by the network of masternodes. This provides for an additional layer of privacy in transactions, while not completely private, this approach is better than the standard bitcoin transaction that provides a 0.5% chance of de-anonymizing an individual transaction that was mixed with 8 rounds of Obfuscation.

Fast transactions featuring guaranteed zero confirmation transactions, we call it *QuickTransact*.

QuickTransact - Instant Transactions: QuickTransact transactions are confirmed and spendable within seconds which are guaranteed by the network of masternodes. There is no need to wait for multiple confirmations to be confident in the validity of the transaction.

A beneficial feature of masternodes is the economic factor. Masternodes provide the network value and they are rewarded with 60 % of the proof of stake reward. This encourages coins being held in private wallets.

Masternodes

These are incentivized nodes that receive rewards based on their availability and their ability to offer network services in a decentralized and trust-less manner. Running a masternode requires locking 4000 SSS collateral for as long as you choose to run the masternode and allows the owner to vote on development proposals.

1776 is the first proof of stake cryptocurrency to be based on the version 0.10 or higher Bitcoin codebase. The PoS structure does not use coin age, meaning you must keep your wallet open at all times, resulting in more constantly available nodes which strengthen the network.

Brief Overview of 1776 (SSS) Cryptocurrency

The Freedom platform has been designed to provide a complete ecosystem for people to create independent economy separate from the coming globalist / central bank / new world order control system. 1776 has been designed for specific technical reasons as set forth in the paper: An Approach to FREEDOM BASED Blockchain and Cryptocurrency Technology.

1. 1776 is decentralized and only a featured cryptocurrency on Freedom.social and FreedomExchange.
2. 177,600,000 maximum coins will be initially minted
3. Proof of Stake
4. Has its own blockchain with the explorer built into the wallet
5. 1776 provides Obfuscation technology to make transactions private
6. 100,000,000, 10 free coins to the first 10,000,000 registered users on www.Freedom.social
7. Additional coins above 10 free coins are sold for \$0.25 cents per coin
8. 1776 can be purchased by eCheck, or instant trades of BTC and ETH
9. 1776 will be utilized to purchase products and services on www.FreedomMarket.social, where local marketplaces are created and products and services can be sold and bought worldwide. FreedomMarket will not participate in GLT Standardization.

Specific technical reasons as set forth in the paper: An Approach to FREEDOM BASED Blockchain and Cryptocurrency Technology were utilized when creating 1776.

Download report here: https://freedom.social/DigitalFreedom_v.05.pdf

- Decentralized cryptocurrency
- Have encryption to be 100% anonymous
- Have its own Blockchain
- Be Proof of Stake (no mining)
- Have its own Marketplace where goods and services can be purchased that are not part of the Centralized Controlled Master Node Blockchains
- Does not participate in GLT Standardization

Selling Points

- A. 1776 is a clone of PIVX. Private Instant Verified Transaction.
- B. 1776 provides anonymous transactions and has its own blockchain.
- C. 1776 is giving away 10 free coins to 10,000,000 people, after achieved, this will provide the second largest blockchain in the world, only second to Bitcoin. When SSS enters the exchanges, the plan is to have a minimum of one million wallets downloaded, thus establishing value.
- D. 1776 will be utilized to purchase products and services on www.FreedomMarket.social, where local marketplaces are created and products and services can be sold and bought worldwide. FreedomMarket will not participate in GLT Standardization.
- E. 1776 will be exposed to millions of people on www.Freedom.social and www.FreedomTube.social.
- F. The Freedom platform is a and activist and truth seekers platform. Freedom.social is a Group driven environment that exposes the Globalist agenda. 20+ Groups will be managed by organizations with hundreds of thousands of existing subscribers or members.
- G. The Freedom platform is an independent media platform.
- H. FreedomTube has over 20 independent media channels going to promote FreedomTube and 1776. YouTube channels will interview Kent Lewiss, and promote the Freedom platform and 1776 to millions of people. The YouTube channels represent millions of subscribers and many millions of monthly views. YouTube channels will promote FreedomTube and 1776.
- I. The Freedom platform has free ipTV for independent media to broadcast live from satellite, IP camera, PC, or smartphone. The Freedom platform also has free WebRTC that independent media can conduct video conferencing interviews with screen sharing.
- J. The Freedom platform will have nightly ipTV broadcasts that will all promote 1776.
- K. Every country in the world will soon have its own cryptocurrency and blockchain. The IMF will soon have a master node blockchain and cryptocurrency. Standardization is being created for very tangible asset and every commodity in the world to be placed on DLT / blockchains worldwide where assets and commodities will be purchased utilizing a countries central bank cryptocurrency. Their plan is to control the world with DLT and cryptocurrency technology. 1776 has been specifically designed to never participate in the coming world control system.
